

CAPITALISM IS DESTROYING THE EARTH

We are facing a crisis. As global warming, desertification of once arable land, species extinction, deforestation, and ocean acidification intensify and accelerate, the existence of life as we know it is being threatened.

This is not the way things have to be.

There is a system that is responsible for these crises and we can fight against it. Capitalism is an economic model driven first and foremost by its need for endless profit and expansion. The ruling classes' insatiable hunger for financial gain comes before any ethical consideration for people, non-human animals, and the environment. Instead of gearing production toward fulfilling human needs in a rational and sustainable way, capitalism produces commodities solely in order to accumulate greater wealth. These immense profits are increasingly concentrated in the hands of the few at the expense of the environment and the majority of humankind; the global proletariat.

Socialism is the only path to a sustainable future. Only through revolution can we hope for a revived and livable planet!

**STOP THE DESTRUCTION OF OUR PLANET!
FIGHT FOR REVOLUTION!**
